

The PSI colloquium

The PSI colloquium is a new psi wide seminar series starting January 2010. The goals of the PSI colloquium are, on the one hand, to expose the staff and the users of PSI to the latest developments taking place in fields outside of their expertise, and, on the other hand, to increase everyone's awareness of the broad ongoing research at PSI. It is intended that the PSI colloquium can be a seed for fruitful multidisciplinary collaborations and reinforce a common sense of purpose.

Coming soon

PROF. DR. MED. JÜRGEN DEBUS,

« Technical development and clinical results of the Heidelberg Ion-Beam Therapy Center (HIT) »
