## SPECIFICATION OF DATAMATRIX ON UNIPUCK ENCLOSURE
FOR USE WITH SLS TELL SAMPLE CHANGER
28.5.2020, W. GLETTIG

Location & Size:

Recommended Datamatrix Label:
Data Matrix ECC 200 standard
Size: 10x10mm
Content: max 14 characters
Only alphanumeric characters and hyphens (Aa-Zz, 0-9, '-')
This results in a 16x16bit or less datamatrix code.

Example:
ABCD0123 (lab identifier & serial number)
Make sure it corresponds to a human readable label,
well readable on the unipuck. This is the label used to
Identify the puck in the sample spreadsheet.

Recommended Colour:
Dark colour unipuck with white etching (good contrast)

Optional:
Human readable label right beside the data matrix code,
containing the exact string encoded in the data matrix.
Ideally using a font that distinguishes between the digit
zero "0" and the capital letter "O".
