

Announcing the 3rd World Conference on Research Integrity

**May 5-8, 2013
Montreal**

Building on the momentum of the first two World Conferences on Research Integrity in Lisbon (2007) and Singapore (2010), the third World Conference will bring together national and institutional leaders, researchers, policy makers, research funders, administrators, journal editors and leaders of professional societies to address breaking issues related to research integrity. Attendees will have opportunities to learn how research organizations worldwide approach integrity issues and cope with challenges to research integrity.

Areas of particular interest for the upcoming conference include:

- integrity in cross-national, cross-disciplinary and cross-sector partnerships
- fostering research integrity through policies, codes, standards and training
- trust in science including political and media issues, responses to misconduct, and correction of the scientific record
- emerging challenges in research integrity associated with new technologies and scientific frontiers.

A call for proposals on *empirical research on research integrity and analyses of related topics* will be issued at a later date.

World Conference Organizing Committee

Co-chairs: Melissa S. Anderson, University of Minnesota, U.S., and Sabine Kleinert, *The Lancet*, UK. Committee Members: Peter Brooks, King Abdullah University of Science and Technology, Saudi Arabia; Dirk de Hen, National Board of Scientific Integrity, Netherlands; Daniele Fanelli, University of Edinburgh, Scotland; Ping Sun, Office of Research Integrity, Ministry of Science and Technology, China; Jan Taplik, Nanyang Technological University, Singapore; Ren Yi, Macquarie University, Australia

World Conferences on Research Integrity, Co-founders and Co-organizers, Nicholas Steneck and Tony Mayer.
