OSGA/EG06 or Zoom Webinar

Disposal of radioactive waste, the status of implementation and scientific-technical issues – a broad overview

Piet Zuidema

former director 'Science and Technology' at Nagra (now retired)

The talk will give a short overview on the status world-wide of implementation of disposal solutions for radioactive waste. Then the Swiss programme will be reviewed and the current status explained. Additionally, some of the scientific and technical issues of importance for repositories in different geological environments will be briefly discussed.
