

# Vladimir Pomjakushin

## *Curriculum Vitae*

### Personal information

Family name: Pomjakushin (or Pomyakushin), (or Pomiakouchine)  
Full name: Vladimir Yur'evich Pomjakushin  
Place and date of birth: Magdeburg, Germany, July 19, 1964  
Marital status: Married, daughter, son (both 1989)  
Citizenships: Switzerland, Russia  
Languages: Russian (mother tongue), English, German  
Business address: Laboratory for Neutron Scattering  
PSI Villigen  
CH-5232 Villigen PSI  
e-mail: Vladimir.Pomjakushin@psi.ch, phone: +41 (0)56 3102094

### Education

1992 **Ph.D** in Physics (Condensed Matter), Joint Institute for Nuclear Research (JINR), Dubna, Russia. Thesis advisor: [Isai I. Gurevich](#), Kurchatov Institute (KI), Moscow  
-1991 Postgraduate study, Moscow Institute of Physics and Technology ([MIPT](#)) and Kurchatov Institute, Moscow  
1987 **M.S.** in Physics, General and Applied Physics department, MIPT and KI, Moscow. Diploma advisor: Dr. Alexandr N. Ponomarev, KI, Moscow

### Appointments

2008-present Senior research scientist, responsible for the high resolution diffractometer [HRPT](#), Laboratory for Neutron Scattering and Imaging ([LNS](#)), Paul Scherrer Institute (PSI)  
2004-2008 Senior research scientist, responsible for the high resolution diffractometer HRPT, LNS, ETHZ Zurich and PSI  
2002-2004 Research scientist, responsible for HRPT, Laboratory for Neutron Scattering (LNS), ETHZ and PSI  
2000-2002 Senior research scientist, head of the group, responsible for the high resolution Fourier diffractometer ([HRFD FDVR-rus](#)), I.M.Frank Laboratory of Neutron Physics, Joint Institute for Nuclear Research ([JINR](#)), Dubna, Russia  
1999-2000 postdoctoral position, co-responsible for the powder diffraction instruments DMC and HRPT at the Laboratory for Neutron Scattering, ETHZ & PSI, Villigen PSI, Switzerland  
1996-1999 Senior research scientist, responsible for the HRFD-diffractometer, [I.M.Frank](#) Laboratory of Neutron Physics, Joint Institute for Nuclear Research (JINR), Dubna, Russia  
1993-1996 Research scientist, [V.P. Dzhelepov](#) Laboratory for Nuclear Problems ([DLNP](#)), JINR, Dubna, Russia (muon spin spectroscopy group MSG of Dr. Vasilii A. Zhukov)  
1988-1993 Junior research scientist, MSG, DLNP, JINR, Dubna, Russia  
1987-1988 Junior research associate, Laboratory of Muon Physics ([Prof. Boris A. Nikolskii](#)<sup>1</sup>), Kurchatov Institute, Russia

---

<sup>1</sup>one of the founder of  $\mu$ SR, together with I. Ivanter, V. Smilga et al

## Other professional activity

- 2011-2018 Member of IUCr Commission on Magnetic Structures CMS established by the Executive Committee in 2011 (<https://www.iucr.org/iucr/commissions/magnetic-structures>)
- 2002-present External users support in the diffraction experiments and data analysis, HRPT/SINQ, PSI
- 2002-present [Physik-Praktikum](#) für Vorgerückte an der ETH Zürich
- 2006 Chairperson, “Neutron diffraction” Microsimposium, European Powder Diffraction Conference, EPDIC-10, Geneva
- 2003-2004 Co-ordinator, Theme: “Colossal Magnetoresistance Manganites and Cobaltates”, Workshop on “LNS research themes 2003,2004 and beyond”, Klosters
- 2003 Member, International Scientific Advisory Committee and Selection panel, Budapest Neutron center (BNC), Hungary
- 2001 Organizing Committee, Meeting in frame of SNSF-SCOPE Joint Research Project “Neutron Diffraction and  $\mu$ SR Study of Phase Separation Phenomenon in Complex Magnetic Oxides”, May 31-June 1, Dubna
- 2000-2003 Co-ordinator from the Russian side, SNSF/SCOPE Project (JINR-Moscow State Univ-ETHZ-PSI)
- 1999 Member, International Advisory Committee on Muon Spin Rotation
- 1996-1998 Co-ordinator from the Russian side, SNSF/CEEC/NIS Project (JINR-KI-ETHZ-PSI)
- 1994 Organizing Committee, [Third International Symposium on Muon and Pion Interactions with Matter](#), 18–21 October, 1994, Dubna, Russia

## Scientific expertise, interests

Determination and description of the crystal and magnetic structures and their underlying symmetries with the use of magnetic Shubnikov and super-space groups and representation (multi)-k vector formalism. Neutron and synchrotron x-ray diffraction studies of the structures using the above symmetry arguments. Study of the local magnetic field distribution and its dynamics by means of muon spin rotation/relaxation technique [e.g. local spin configurations in (anti)ferromagnetics, flux lattice in superconductors].

Some of recent research directions are (1) multi-k structures by symmetry allowing interesting consequences, e.g., skyrmion formation and the presence of secondary order parameters; (2) quasi-1D dimensional quantum magnets; (3) multiferroic and charge ordered materials with the symmetry dictated coupling between spin and lattice; (4) magnetic and superconducting iron chalcogenides.

Development and maintenance of the experimental facilities for powder neutron diffraction: high resolution powder diffractometer HRPT/SINQ ([www.psi.ch/sinq/hrpt](http://www.psi.ch/sinq/hrpt)); time-of-flight high resolution Fourier diffractometer HRFD/IBR2, Dubna ([HRFD FDVR-rus](#)).
