

PSI Career Mail

PSI Career Center – Training. Career. Happiness.

Dear all

I am happy to send you the January/February edition of the PSI career mail.

This time, the spotlight is on the Children's hospital in Zurich. They have their own research center and offer challenging positions for people with a PSI background. Have a look at it and apply for any open position interesting to you!

I am in the midst of planning this year's career events at PSI – presumably with some virtual ones as well. As not all details are set yet, I'll inform all of you as soon as possible in PSI Aktuell, the next career mail and/or on the [intranet page](#).

In the meantime, I wish you all the best and stay healthy.

Enjoy reading,
Yvonne

Spotlight...

Working and doing research with/for children:

Imagine you work in a company whose CEO helps clear the car park and driveway of snow over lunch. In addition, that explicitly cares only about the well-being of the next generations.

The Research Centre for the Child (FZK) at the Children's Hospital Zurich is unique in Switzerland. The firm link between research and clinical

experience guarantees that the latest scientific findings are quickly made available to patients and translated into life-saving therapies.

The Children's hospital Zurich is always looking for young researcher. This could be a challenging next career step for some of you. Check it out:
