## 2. Beam schedules

The 590 MeV ring accelerator is scheduled for 36 weeks of high intensity beam production from April 17 to December 23, 2009 (see research schedule in the appendix). In accordance with the new BAG license, the primary beam intensity will be raised to regular productions of 2.2 mA, with some peak intensity shifts of 2.4 mA. Stable operation shall always have priority over maximal currents. The basic beam structure of three-week cycles (18 days of continuous beam production, interrupted by ~ 3 days of maintenance, beam development and accelerator training) will be maintained, see <http://abe.web.psi.ch/schedule/yearplan2009.php>.

As usual, the beam schedules 2009 will be regularly updated and is displayed on the internet:  
- [http://ltp.web.psi.ch/accelerator\\_and\\_beams/schedule.pdf](http://ltp.web.psi.ch/accelerator_and_beams/schedule.pdf) for the general schedule  
- <http://imu.web.psi.ch/facilities/schedules.html> for μSR details

### **3. Varia**

The next meeting BV 41 is scheduled for February 17 - 19, 2010. The first day is reserved for reviews of  $\mu\text{e}\gamma$  and UCN. The **deadline** for beam requests, new proposals and addenda in particle physics is **January 18, 2010**. Users are requested to make electronic submissions of their documents (PDF Files).

The dates for the next meeting BVRA-2010, are not settled yet.
