## **2. Beam schedules**

The 590 MeV ring accelerator is scheduled for 32 weeks of high intensity beam production from May 15 to December 22.

Unfortunately, the MuCOOL experiment R-14-02 had to be cut from 4 to 2.5 weeks due to limited beam time available in piE1 area's. Therefore, the operators of muSR "DOLLY" are invited to finish their program in December a few days earlier if possible.

The Spin Rotator generally installed in piE1 will be used this year also in piE5. To avoid damages it is strongly recommended that the total operational voltage is kept below 540 kV.

As usual, the beam schedules 2014 will be regularly updated and are displayed on the internet:

- <http://www.psi.ch/ltp/facilities> for the general schedule
- <http://www.psi.ch/lmu/beamtime-schedule> for  $\mu$ SR details

## **3. Acknowledgement**

At this meeting Dr. Cyrus Hoffman finished his term as BVR president. We congratulate and thank him very much for his 13 years long superb lead of all BVR user meetings! We are happy that Cy will continue to serve the committee for a transition period. To the new president, Prof. Bradley W. Filippone, we wish good luck and as much success in the coming years!

## **4. Varia**

The next meeting **BV46** is scheduled for **February 09 - 11, 2015**. The first day is reserved for reviews of MUSE, Mu3e,  $\mu$ ey and UCN experiments. The **deadline** for beam requests, new proposals and addenda is **January 15, 2015**. Users are requested to make electronic submissions of their documents (pdf files).

The dates for the next meeting BVRA-2014 are not fixed yet.
